70012 - Industrial Placements Assessment

Your third-year Industrial Placement is a compulsory part of your MEng degree, and you must pass it to progress to the fourth year. The placement is pass/fail, and the decision is based on the placement itself, a written executive summary and short presentation.

EXECUTIVE SUMMARY

This is a reflective summary of your work done during your Industrial Placement. It should comprise a maximum of 2 sides of an A4 sheet, up to 1000 words. It should include the following:

- Information about the company and the team(s) you were a part of.
- Reflection on any legal, social, ethical, environmental, and professional issues you encountered. For example, you might like to discuss induction/onboarding, corporate culture, training, well-being, communications, support for remote working, etc. If any of your work involves legal/ethical considerations or has social or environmental implications, you should mention those, too.
- Reflection on the experience as a whole, in particular, how three years in DoC prepared you for the placement, how the placement may help you in your studies and career, and whether there is anything that you think our department should do to help improve our programmes considering your work experience.

Please submit your executive summary via **https://scientia.doc.ic.ac.uk/** by 7 pm on Monday, 28th of September 2026, under the module 'Industrial Placement'.

PRESENTATION

At the end of the Industrial Placement you are required to give an oral presentation of 15 minutes duration summarising the placement. You will be reviewed on your presentation skills, i.e. your presentation of the tasks performed during the placement, not on the nature of the tasks themselves, nor on the technical or practical content of those tasks.

There are no marks attached to the presentation. The presentation should:

- Give a clear and concise introduction to the company, and the team or group you worked in.
- Give a description of all the projects you worked on, focussing on goals, ideas, problems, and outcomes rather than low-level technical details.
- Conclude with the lessons learnt and the experience gained, placed in the context of your degree.

Your company supervisor and/or other representatives of the company are very welcome to attend these presentations.

In case you or your supervisor feel that there is anything in the work you have done of which a presentation might conflict with confidentiality, you need to mask the confidential material on the slides. However it is preferably for you to remove confidential information and present what you did on a 'higher level' or talk in 'general terms'. Consider doing the presentation at your workplace in advance for approval, or send your slides to your line manager.

TIPS: VISUAL AIDS, AUDIBILITY AND TIMING

- Computer projection equipment will be available in the lecture rooms. It is always advisable to bring an extra copy of your slides with you as a backup on a memory stick.
- Make sure your visual presentation is clearly legible from the back of the room. Give careful consideration to the colours used and the size of fonts.
- Avoid 'wordy' slides; use diagrams wherever possible.
- Speak loudly, clearly and slowly so that everyone can hear.
- Twelve minutes is a very short time and you will not be allowed to overrun, so please practice your presentation beforehand!

TIMING YOUR PRESENTATION

The time span is 15 minutes, including 3 minutes of question-time. The time limit is strict, and you will be cut off if you overrun.

- Your talk should take around 12 minutes..
- There are 3 minutes at the end of your talk for questions; normally, your tutor will have questions, but, if time allows, anybody present in the room may raise a question.

PRESENTATION SLIDES

~~**Deadline: 7pm, 2nd October 2026 via https://scientia.doc.ic.ac.uk/.** Submit your presentation slides under the module 'Industrial Placement'~~

UPDATE: you are no longer required to submit slides, only deliver the presentation and submit the Executive Summary.

TIMETABLE: Presentations will take place in week 1, on 1st and 2nd October 2026.

Please note that you should not swap slots on your own initiative. The date and time of your presentation cannot be changed once the timetable is published except in very exceptional circumstances.

WHO WILL ATTEND?

The presentations are chaired by a member of staff. Your presentation will be viewed by the new cohort of MEng 3rd years, who'll be asked to give useful feedback. You are also asked to invite your company's manager(s) and mentor(s) as it is beneficial them to know the outcome of your work for the past three to six months. Your friends and colleagues are also welcome.

ASSESSMENT AND FEEDBACK

There will be a nominal mark and brief written feedback on the executive summary. To pass, the placement must be considered completed satisfactorily and the executive summary and presentation must be of an acceptable standard.
